Summary

Software Engineering student from FAST-NUCES , building graphical and full-stack applications with strong software design fundamentals.

Technical Skills

Languages: HTML, CSS, JavaScript, Python, SQL, C++ , C, Assembly

Frameworks & Tools: SFML, Flask, Three.js, Git, GitHub, Visual Studio, Canva

Concepts: OOP, SOLID Principles, Design Patterns, UML, Data Structures & Algorithms, File I/O, RESTful APIs

Education

BS Software Engineering, FAST-NUCES, Lahore

- **Coursework:** DSA, OOP, Database Systems, Operating Systems, Computer Organization & Assembly, Software Requirements Engineering, Software Design & Architecture, Software Construction & Development, Software Quality Engineering, Artificial Intelligence

Intermediate, Punjab College, Lahore

Projects

Portfolio Website — HTML, CSS, JS

- Personal portfolio site showcasing full-stack, game-development (C++/SFML), and Flask/web project work
- Deployed as a static site on GitHub Pages: zainabsharif.github.io/Zainab-Sharif-Portfolio

MoodFlix — HTML, CSS, JS, Three.js

- Recommendation engine (movies/TV/anime/songs) filterable by mood, genre, decade, popularity; integrates TMDB, Last.fm, Jikan APIs
- Interactive 3D synthwave carousel built with Three.js (bloom post-processing); legal free-watch link resolver with offline mock-data fallback

Delicate Stones — HTML, CSS, JS

- Responsive single-page storefront for a jewelry brand with a custom automated FAQ chat assistant and one-tap WhatsApp ordering
- Deployed as a dependency-free static site on GitHub Pages

Pomodoro Timer — HTML, CSS, JS

- Single-page productivity timer with auto-transitioning focus/break cycles, live countdown, and Web Audio API cycle-end alerts
- Persistent session history via localStorage; fully responsive from mobile to desktop

Nexus E-Library Management System — Python, Flask, MSSQL

- Full-stack research paper platform: JWT auth with bcrypt hashing, role-based access (Admin/Researcher/Student), RESTful API
- N-gram/Jaccard-similarity plagiarism detector and a bookmark-based recommendation engine with cold-start fallback

Arcade Games: Tic Tac Toe & Hangman — C++ , SFML

- Two fully graphical SFML games with custom Canva-designed assets and mouse-driven input; win/loss/draw and word-guess game-state logic
- Category-based word file loading (Hangman) and integrated background audio (Tic Tac Toe)

Extracurricular Activities

Graphic Design Officer — Career Counselling Society & ACM Student Chapter, FAST-NUCES

- Designed reel covers, Instagram posts, and event banners for society and chapter outreach, maintaining consistent visual branding across platforms
